Public Health - Mangalore Municipal Council — Shifting of the municipal trenching ground — Orders passed.

J.S.(P.H)

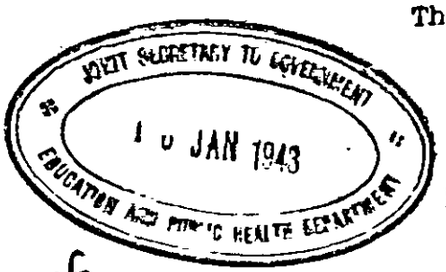
A report may be called for from the D.P.H.

MB
14/1/48
M (P.H.)

To

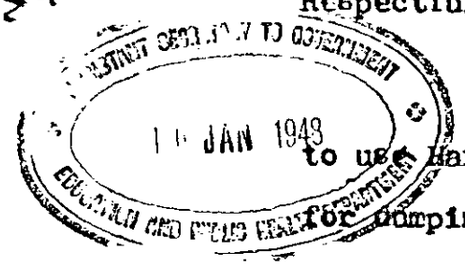
The Minister of Public Health,

Madras.



Humble petition of the following:

3446



Respectfully Sheweth:-

That it is proposed by the Municipality to use Hari Padav in Derebail village as a trenching ground for dumping human rubbish from the Municipality.

The said Hari Padav is abutting the northern limit of the Municipality. It is about 40 acres in extent and about 120 ft above the surrounding lands; there are a number of perennial springs all around the said Hari Padav situated in Survey No.129 and 170-1.

There are a number of residential houses and agricultural lands in the surrounding the plateau. It is in the close proximity of the golf ground in the Kadri Hill where the Forest Officer's Bungalow and other residential quarters also are situated. It is an alternative site proposed to be used for the extensive house-building Scheme and also for shifting the Government Wenlock Hospital.

If human rubbish is dumped at such altitude not only contaminate the entire atmosphere permeating the city but also it will make drinking water in the neighbourhood undrinkable by virtue of the fact that the spring water emanating from those regions would be saturated with the night soil.

For a considerable length of time this

extensive plain is being used as a grazing ground and also for evening walks for the persons in the neighbourhood. It also appears that it has been marked as a prohibited area reserved for an aerodrome.

As early as 1929 when this site was once thought of by the Municipality to use it as a trenching ground there was an uproar of protest from one and all in the neighbourhood. Memorials were sent to the Director of Public Health, to the Chairman of the Municipality and also the Collector. Ultimately the then Collector Mr. G. E. Wells and also the Government thought it proper not to accede to the suggestions of the Municipality and the Government declined to sanction the plot for the said purpose.

It appears that the Municipality had also recorded resolutions to the effect that the trenching grounds ought not to be opened within five miles of the Municipality, whereas the above referred Hari Padav is on the border of the Municipality and the town and its suburbs having developed several schools, churches, factories and residential houses in the close proximity of the said Hari Padavu have come up.

If trenching ground is opened at the said place, the entire neighbourhood would be rendered uninhabitable and the Municipality instead of attending to the needs and amenities of the public would be rendering maximum disservice to the citizens of that locality.

Prominent members of the public, such as Mr.K.R.Karanth, late Dr.K.Vittal Shetty and others appear to have suggested even on previous occasions that trenching ground for dumping night soil ought to be opened either at Kavoor Padavu, Kunjatha-bail, Kudpu or on the sandspits by the seashore to the north-west of the Municipality. It has been also proposed by medical men that if night soil is dumped in sandspits in the seashore it might be sterilized and be destroyed by the sea-water soaking through the sand.

The last Scheme suggested herein is worth being carried into practice so that the civic amenities for the general public might be enhanced by preserving Hari Padav and such other excellent sites for development according to modern lines. The petitioners once again most respectfully request the Municipality not to use Hari Padav as a dumping ground of nightsoil and the kind Director of Public Health Madras, be pleased to direct the Municipality, to adopt the alternative Schemes suggested, for which act of kindness we shall ever be grateful.

Sir,

Land - Mangalore Municipality - Shifting of the trenching ground.
Ref: Government Memorandum No.3446-1-E2, P.H., dated 26- 1- 1948.

The site at Aripadavu was proposed for trenching of municipal filth as the present ground is agreed on all hands to be shifted. However, the Collector of South Kanara has after personal inspection dropped the proposal vide copy of the proceedings D.Dis.9398/47 dated 30-12-47 enclosed A fresh site at Kudpi at mile 6/2 has been selected by the Collector and its proposals for acquisition are under formulation.

The sites at Aripadavu (objected to in the petition and since dropped by the Collector) was personally inspected by the Director of Public Health during his recent visit to this place. The copy of the petition received along with the above Memorandum is enclosed.

Forwarded

Commissioner.

8) the connected records and inspection notes dated 26-12-1947.

- - - - - - - - - - - -

After a local inspection, the Collection finds that the sites at Aripadavu and Mudusheddai are both unsuitable for the purpose of trenching ground of the Mangalore municipality. The Aripadavu site is on the top of a hill to which access will be extremely difficult, also there is much opposition to the site much of which is justified. And in any case, it will spoil an excellent bit of land that ought to be reserved for building purposes. The Mudushedde site is suitable, but it lies 4-5 miles further on along a twisting winding narrow road that would be tounsafe for the use of the municipal lorries. The plot cannot also be approached very well from the Kadri hill side, since that road is even worse.

What is wanted is an open site 1/4 to 1/2 mile off on the main roads leading out of town say 5-8 miles distant from the latter. The only road that looks at all possible is the main Karkal road. The ~~Tahsildar~~ Tahsildar, Mangalore is requested to make further inspection along with the Municipal Health Officer and commissioner and select a suitable and unobjectionable site urgently. The municipality can then take action for the alienation

or the acquisition of the lands concerned.

R.No. 28270-5/Hyg/47 dated 23rd April 1948 ;

Sir,

Sub: Public Health - Mangalore Municipality - Shifting of the municipal trenching ground outside the municipal area.

Ref: Government Memorandum No.3446-1-E2.P.H. dated 26-1-1948.

In forwarding herewith letter No.C.4/8931/47 dated 4-2-48 from the Commissioner, Municipal Council, Mangalore, I have the honour to state that the question of shifting the municipal trenching ground from its present site has been engaging the attention of the Municipal Council for sometime Sites were selected at different places, but on inspection were found to be unsuitable, either from the point of view of distance or unsuitability of the ground for trenching purposes. A new site has recently been selected at Kudpi

P.T.O.

at mile 6/2 after a joint inspection by the Collector, South Kanara, Municipal Commissioner, District Health Officer, Municipal Health Officer and the Tahsildar, Mangalore. The Municipal Health Officer, Mangalore who has been requested to send a report has reported that trial pits are being dug . . to find out the suitability of the soil and that a further repor will be submitted later. A copy of his letter is enclosed for the information of Government. A further report will be submited to Government as soon as the report from the Municipal Health Officer is received.

Copy of letter R.O.C.H2-2770-48 dated 28-7-48 of the Municipal Health Officer, Mangalore to the Director of Public Health.

The site selected for the proposed trenching ground at Vomanjur Padavu at 6.2 mile stone is suitable for the trenching ground subject to the condition that S.Nos. 19.2 and 20.3 of Thiruvail village are not reserved for Mangalore Water Supply Scheme.

After deducting for the surface rock etc., the area available for trenching is 45 acres.

There are no residential houses within an area of 440 yards from the proposed trenching ground.

The space upto 200 yards from the road margin has to be reserved for the quarters of 16 trench diggers and one maistry with plantations behind.

A well with overhead tank and a ~~ax~~ shed for storing tools and plant has to be provided.

Three more additional lorries will be necessary with the following staff.

Drivers - 3 on Rs. 35-1-45 plus D.A.

Coolies -12 on Rs. 21 plus D.A.

I have sent the above suggestions to the Commissioner, Mangalore Municipality, Mangalore.

In continuation of this office letter R.No.28270-12-Hyg/48 dated 29-10-48, I forward herewith a copy of letter No. 14280-1/48 W.S./39-(5)W.S. dated 9-11-48 of the Sanitary Engineer to Government and recommend that the site in Tiruvail village S.No. 19/2 and 20/3 proposed by the Municipal Health Officer, Mangalore for the purpose of a trenching ground, may be approved.

for Director of Public Health,
Madras.

PTO

Copy of letter No.14280-1/48 W.S./39-(5) W.S. dated 8-11-48 of the Sanitary Engineer to Government.

The proposed site at Kudpu in Tiruvail village (S.No.19/2 and 20/3) for the Municipal Trenching Ground, does not interfere with the protected Water Supply scheme for Mangalore. The original source (Hasamar Valley) has since been finally abandoned, in favour of Gurpur river source. I have therefore no objection to the shifting of the trenching ground as proposed by the Municipal Health Officer, and referred to in your letter under reference.

Sir,

Subject:- Shifting of the present Trenching ground to Kudupu

Put up
to
4

30225

I am constrained to approach and place before you the following facts, with a request that you may be pleased to do that what is necessary and see that our sufferings are once for all ended with little or no delay in the matter.

2. The Government have directed the Municipality to shift the Trenching Ground to Kudupu. The Collector Mr.J.F. Saunders, I.C.S. had suggested this site giving a reasonable consideration to the seriousness of the situation at the present Trenching Ground. This site has been approved by the Municipality in consultation with the Director of Public Health, who has held a thorough investigation in the matter. It has also been unanimously decided by all, to shift the Trenching ground there as their last and final decision and the question of going back from this decision as was done hitherto will never be considered under any circumstances.

3. The Municipality has long ago submitted its applications to your goodself for the alienation of about 28 acres of Government lands and acquisition of about 60 acres of private lands for the new Trenching Ground. These papers are pending in your office for necessary action in the matter.

4. I may be permitted to place before you the following two facts in this connection. The present trenching ground has been in continuous use for the last 30 years which is too abnormal a period. There is not even 1 10th part of the space necessary for the trenching ground there. For want of

space trenching is invariably conducted on the road margins and within a few (say 10- 20) yards from residential quarters and shops and the trenches are opened too early for re trenching purposes. Our well waters have been tested at the King's Institute, Guindy and have been found to be greatly effected. With the burst of the next monsoons before June this year all the trenched matter and filth, will be washed down, which will further tend to effect our drinking water to a great extent. You may please refer to the Municipal Health Officer on the subject.

5. We enclose herein a copy of our Memorial dated 12-11-48 to the Hon'ble the late Mr. Daniel Thomas, Minister for Local Administration, presented to him, when he visited the Trenching Ground that day. This will enable to give you a small insight into the struggle we have put up against the use of this land for trenching purposes.

6. It is, therefore, urgent and necessary that the Trenching Ground should be shifted to the new site before the commencement of the monsoons. Though the Municipality is alive to the question and is too eager to act in the matter, they are handicapped from doing so, as they were unable to get the site till now. If the Government waste land about 28 acres be immediately alienated to them the trenching could be conveniently shifted to the new site before the monsoons.

7. We may be permitted to state, that we are not able to bear this nuisance and sufferings any longer and unless we see and feel sure that we are able to get a relief from this scourage before the end of May this year, we have no option left, but to institute legal proceedings in a competent court of law against the Municipality to seek the necessary redress.

We, therefore, pray that our representations may be favourably considered and necessary relief granted to us.

Thanking you in anticipation,

Yours faithfully,

A. Subrayapai

Sir,

Sub: Public Health - Mangalore Municipality - Shifting of the Municipal Trenching ground - action taken by the Municipal Council and stage of work - Report - Submitted.

Ref: Government Memorandum No. 31330-1-49 F1 P.H. dated 30-4-49.

39477

The Municipal Council has resolved to have the private lands and the Government lands, covered by the new site selected for the purpose and approved in the G.O. referred to in the Government memorandum, acquired and alienated respectively and necessary proposals have been submitted to th Collector of South Kanara, Mangalore. The matter is engaging the personal attention of the Collector as would be seen from his D.O. letter Ref.C.26768/48 B 1 dated 8-5-49 to the Chairman, Municipal Council, Mangalore (copy enclosed).

Commissioner.

Collector's Office,S.K.,
Mangalore, Dated 8- 5- 1949.

Dear Mr. Pais,

Subject: Trenching ground for Mangalore Municipality

With reference to the compromise suggestion made by me there have been further representations made to me on the 7th May 1949 before I left the Sanatorium site. In order to be on the safe side, I have asked for a combined sketch showing the location of the T.B. Sanatorium and the Survey Numbers proposed to be used for the trenching ground. After I receive it I shall perambulate the area and shall mark the high-level hump to the south of which it might be possible to have your trenching ground without objection. I hope to be able to suggest a formal compromise solution by the end of this month.

2. In the meanwhile, I have asked the Tahsildar, Mangalore to let me know any other possible sites at the disposal of Government. I can assure you, I am as anxious to solve this problem facing the Municipal Council as the other one which is very dear to my heart - the T.B.Sanatorium, and I shall do whatever is humanly possible to find a satisfactory and lasting solution to both.

Your sincerely,
Sd.S.R.Kaiwar
